Fund Management System with Business Intelligence Analytics for India's National Dairy Development Board

The Client

The National Dairy Development Board promotes finances and supports producer-owned and controlled organizations across India. Its programs and activities are designed to strengthen farmer cooperatives and to support national policies that are designed for the growth of these institutions. The NDDB role in India is undeniably important to India's economy, and to the cultural, societal and agricultural needs and initiatives of villages and farmers in support of animal breeding, nutrition and health related issues. The NDDB site and team provides information for consumers, dairy farmers, cooperative and engineering services, sector analysis and studies and more.

The Objective

The client wished to upgrade and improve its technology and tools to support the NDDB team and its stakeholders and information consumers. The project requirements included analytical tools, financial systems with budget allocation and utilization tools and other features and functions to support the organization. One of the primary objectives of this project was the support of the National Dairy Plan I (NDP I) with a network of end implementing agencies. This is a scientifically planned multi-state initiative to increase productivity of milch animals and thereby increase milk production to meet the rapidly growing demand for milk through scientific breeding and feeding and to provide rural milk producers with greater access to the organised milk processing sector. This initiative covers 18 states with more than 158 implementing agencies and 340+ sub projects.

The Solution

The Elegant MicroWeb team coordinated its project and support approach to provide solutions to manage finances, budgets, workflow and analysis with crucial support for growth, stability and advancement of the NDDB mission and vision. Elegant MicroWeb also provided support for NDDB analytical requirements with the Elegant MicroWeb flagship business intelligence solution, ElegantJ BI, with BI tools for reporting, personalized dashboards, mobile BI, key performance indicators (KPIs) and other sophisticated, easy-to-use business intelligence features.

The scope of the project included development of Fund Management System that includes:

- Project and subproject definition & plan
- Requisition to Government of India for budget and it’s receipt management
- Target & Budget allocation for projects upto activity level
Case Study

Fund Management System with Business Intelligence Analytics for India's National Dairy Development Board

- Payment of allocated budget and its tracking against utilization
- Utilization of budgets for projects and variance
- Workflow with budget allocation and utilization approval
